Homework 1

Stan Ford

Due January 1, 2000

Problem 1: Example of a Proof

Problem Description. ex: Prove that $\langle \rangle$.

Proof. proof body.

Typst uses a latex-like syntax for math:

$$\|A\|_p = \max_{\|x\|_p=1} (Ax)$$

You can display a vectors like

$$\begin{pmatrix} a \\ b \\ c \end{pmatrix} \cdot \begin{pmatrix} 1 \\ 2 \\ 3 \end{pmatrix} = a + 2b + 3c$$

You can display matrices like

$$\begin{pmatrix} 1 & 2 & \dots & 10 \\ 2 & 2 & \dots & 10 \\ \vdots & \vdots & \ddots & \vdots \\ 10 & 10 & \dots & 10 \end{pmatrix}$$

□

Problem 2: Example of an Incomplete Proof

Problem Description. ex: Prove that $\langle \rangle$.

Proof.

Work in progress: this section is still being written/reviewed.

Proof that I haven't finished yet.

□
